El ction/Restriction

- Restriction to one of the following inventions is required under
 U.S.C. 121:
 - Claims 1-10 drawn to a semiconductor device, classified in class 257, subclass 368.
 - II. Claim 11-18 drawn to a process of making a semiconductor device, classified in class 438, subclass 22+.
- 2. The inventions are distinct, each from the other because of the following Inventions II and I are related as process of making and product made. reasons: The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP □ 806.05(f)). In the instant case unpatentability of Group II invention would not necessarily imply unpatentability of the process of the group II invention, since the device of group I invention could be made by processes different from those of group II invention. For example, in claim 11, instead of depositing an insulating layer in the hole and on the electrode lines and etching the insulating layer using an anisotropic etching method to form a spacer at an edge of the electrode lines, depositing an insulating layer only on the electrode lines, etching the insulating layer using an anisotropic etching method to form a spacer at an edge of the electrode lines, and then depositing an insulating layer in the hole.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
